To support our international projects, we are looking for a

Purchase & Logistic Engineer

Gemco performs foundry projects worldwide for clients in the automotive, railway, mining, energy and many other industries.

Our focus is on providing customized foundry solutions. We select and integrate different equipment from established suppliers, but we also design/develop and build dedicated machines as client specific solutions.

Our project teams are lean and multidisciplinary, with teams sized up to 10 colleagues.

Our Project Managers are in charge of their project teams and responsible for the realization.

Project teams consist of Project Engineers, Design Engineers, experienced Foundry Technologists and Site Managers. As Purchase & Logistic Engineer you support the teams in the purchasing process and the complicated transport and logistics of the machinery from our suppliers to the project site.

Your function

- You support the purchasing processes within a project. You monitor the contractual and commercial conditions of the purchases.
- You make agreements with suppliers and customers in consultation with the project team to ensure that the goods are available at the right time in the right place.
- You are responsible for planning and execution of all transports and eventually (temporary) storage of the goods together with a logistic service provider.
- You provide the correct export documents, to enable a smooth custom clearance of the goods and a smooth financial settlement of the documentary credits.
- You are also responsible for the choice and control of the correct packaging of the goods, performed by a logistics service provider.
- For inspection of the goods or the packing procedures, you will occasionally visit (sometimes foreign) suppliers or our project sites.

Your profile

- You have completed a course at Bachelor level, for example technical business administration or logistics.
- You have extensive experience with the processing of export documents and the financial settlement of export transactions
- You can easily communicate, in word and in writing. Also in the English language.
- You can work well in a team.

We offer:

- A dynamic function in a enthusiastic and result-oriented team;
- A large degree of independence and responsibility;
- Excellent salary and fringe benefits (including complete remuneration for stays abroad and a hardship allowance);
- A healthy family business with ambitious management;
- International culture and open work atmosphere.

Information

For information about this position and our company, you can contact Daan van Heereveld, Operations Manager, or Monique Westendorp, HR-Manager. Phone 040-2643607.
