

Within the worldwide foundry industry Gemco Cast Metal Technology stands for Gemco Engineers BV in the Netherlands (headquarters) and Knight Wendling GmbH in Germany. We are internationally operating companies with offices in North America, Russia, and China.

Gemco provides consulting, engineering and project management services to international renowned companies who realize projects within the cast metal industry. For more information, please visit our website: www.gemco.nl

To support our international projects, we are looking for a

Senior Project Manager

Gemco realizes foundry projects worldwide for clients in the automotive, railway, mining, energy and many other industries.

Typical projects are the design and realization of complete new foundry plants or the restructuring and modernization of existing foundries.

Our focus is on providing customized foundry solutions. We select and integrate different equipment from established suppliers, but we also design/develop and build dedicated machines as client specific solutions.

Our project teams are lean and multidisciplinary; with teams sized up to 10 colleagues, you cover all aspects of these challenging projects.

Our Project Managers are in charge of their project teams and responsible for the realization of the project. Project teams consist of Project Engineers, Design Engineers, and experienced Foundry Technologists.

The Function:

Project Management tasks include maintaining close contact with the customer as well as suppliers, maintaining the budget and the targeted project planning.

You will take technical-, planning- and budget- related decisions in cooperation with the customer. You will be assisted by a team of project engineers who are responsible for different disciplines / departments (such as production technology, civil and building works, utilities, environmental control, etc.) and designers for the overall interface-engineering.

You report directly the COO and/or CEO

Your Profile:

- Technical mechanical education, MSc or similar Work/Think level;
- You have proven experience (at least five years) within the foundry technology;
- You have proven experience (at least five years) as a project manager in an international environment. For example, you have gained this experience as a project manager in the heavy industry (for example building factories, shipbuilding or mining industry);
- Good knowledge of English (verbal and written) and preferably Dutch as our head office is located in the Netherlands. German or other languages are a great asset;
- You show initiative, are energetic and you have a client-oriented attitude;
- You are creative and able to handle a lot of details; you are quality oriented and persistent;
- You are willing to travel and stay abroad (also for a longer period of time). Staying abroad depends on the location where the project is being carried out and covers around 30% of your time.

- You are flexible and can easily adjust to different circumstances and different cultures;
- You are a strong and straightforward team player and dare to take responsibility.

We offer:

- A dynamic function in a enthusiastic and result-oriented team;
- A large degree of independence and responsibility;
- Excellent salary and fringe benefits (including complete remuneration for stays abroad and a hardship allowance);
- A healthy family business with ambitious management;
- International culture and open work atmosphere.
